Spreading Some Floral Cheer

Members of the Suburban Garden Club created more than 50 individual holiday and winter-themed floral arrangements (above) in vintage milk glass vases and delivered them to patients at Connecticut Hospice in Branford and residents at The Highlands Health Care Center in Cheshire. In a joint effort with the Cheshire Garden Club, members continued their annual tradition of supporting the Wadsworth Atheneum's Festival of Trees and Traditions fundraiser. Members designed, created and donated a large wreath made of various types of permanent botanical spruce and pine and decorated it with champagne-colored Magnolia flowers surrounded by berries, fiddle heads and foliage.

Members also decorated several locations for the holidays including the Ronald McDonald House and the interior and exterior of the Hitchcock-Phillips House for the Historical Society's annual open house.
